WAFER TERMS AND CONDITIONS OF PURCHASE

[Also available at <http://www.maximintegrated.com/legal/terms/>]

Any purchase by **Maxim Integrated Products International Limited (Ireland)** (hereinafter “Buyer”) is expressly made conditional on Seller’s acceptance of these Terms and Conditions of Purchase.

1. **ACCEPTANCE.** Seller shall be deemed to have assented to all terms and conditions contained herein upon Seller’s acknowledgment of an order (“Order”) placed by Buyer for Wafers or commencement of performance pursuant hereto. Conditions stated in Seller’s acknowledgment or acceptance of an Order or in any quotation or invoice shall not be binding unless expressly agreed to in writing by an authorized representative of Buyer. Seller may not ship under reservation. Buyer’s failure to object to provisions contained in any communication from Seller, or Buyer’s acceptance of Wafers or services under an Order, shall not constitute acceptance of Seller’s terms and conditions of sale nor be deemed a waiver of any of the provisions contained herein. From time to time Buyer may accept certain of Seller’s terms and conditions of sale by signing Seller’s proposed sale agreement. If such acceptance is preceded or accompanied by Buyer’s interpretation of Seller’s terms and conditions, such interpretation shall control the construction or interpretation of the meaning of Seller’s terms and conditions.

2. **DEFINITIONS.** As used in this Agreement, the following terms will have the following respective meanings: “Order” means a written order placed by Buyer to Seller for the purchase of Wafers specifying the quantity, diameter, grade, delivery date and shipping instructions. “Processes” means Seller’s wafer production processes used to produce silicon Wafers under any Order. “Wafer” means a round slice of silicon manufactured by Seller to Buyer Specifications for use by Buyer to produce integrated circuits. “Specifications” means Buyer technical specifications [San Jose, Beaverton, San Antonio Fabs] and 37-100005 (Dallas)] {General} Wafer Composition Specification #62-3266 incorporated herein by reference and any additional Buyer requirements or instructions set forth in an Order. “Quality and Reliability Criteria” means Seller’s manufacturing Process quality and reliability specifications, including, without limitation, wafer geometry, surface perfection and cleanliness, as set forth in Seller’s specification attached to Seller’s quote and which are to be followed by Seller in manufacturing Wafers under any Order.

3. **ACCEPTANCE OF ORDERS.** Seller will supply Buyer a schedule of first commit exit-factory dates within five (5) business days of receipt of an Order. Seller will ensure that the first commit lot exit-factory date will meet Buyer’s requested delivery date, unless otherwise agreed upon in writing. Seller agrees to produce Wafers that meet Seller’s Quality and Reliability Criteria and Buyer Specifications. Specifications may only be changed by written mutual agreement of Buyer and Seller.

4. **PRICES.** Buyer shall pay Seller for Wafers manufactured by Seller in accordance with Buyer Specifications at the prices indicated on the Order. If the price is omitted from the Order, Seller shall invoice Buyer at the last price quoted by Seller to Buyer and mutually agreed upon. Unless otherwise specified on the face of an Order, prices are inclusive of all taxes and other charges such as shipping and delivery charges, duties, customs, tariffs, imposts and government-imposed charges, other than Value Added Tax. Wafers will be delivered DDP (Incoterms 2000), Buyer destination, freight and cartage prepaid, unless otherwise agreed upon by the parties in writing. Seller shall credit Buyer for any tax refund or credit adjustments received by Seller on taxes paid to Seller by Buyer with respect to Wafers provided under an Order. Seller’s prices shall not be higher than last quoted or charged to Buyer unless otherwise agreed in writing. If Buyer and Seller mutually agree in writing to reduce the number of steps in the manufacture of any Wafer, then the Purchase Price for such Wafer shall be reduced accordingly.

5. **PAYMENT.** Payment will be made within thirty (30) days from Buyer’s receipt of Seller’s correct and valid invoice for Wafers delivered and accepted or services rendered and accepted. Payment may be withheld or setoffs made against Seller if Seller is not performing work pursuant to the Order. If Buyer returns an invoice to Seller for any reason not attributable to the fault of Buyer, any applicable discount period will commence on the date of receipt of a corrected invoice by Buyer. Payment of any item will not be deemed an

acceptance of the Wafers or a waiver of any right of Buyer to test or inspect the Wafers. Notwithstanding the foregoing, Buyer shall not be obligated to pay invoices for Wafers on which a Return Material Authorization number has been issued or for which a Return Material Authorization request is pending.

6. **DELIVERY.** Time is of the essence for any Order. Failure by Seller to meet delivery dates specified in Buyer’s Order may result in substantial damages to Buyer due to commitments to its customers and will constitute a material breach of this Order. Buyer may, at its option take one or more of the following actions: (a) extend the time for delivery; (b) cancel the Order in whole or in part; (c) require Seller to ship all or part of the Wafers by prepaid air freight at Seller’s expense until Seller’s deliveries are in accordance with the requirements of the Order. Buyer will not be liable to Seller for any cost, expenses or loss whatsoever occasioned by a cancellation of the Order. Seller agrees to pay Buyer any penalty and/or damages imposed upon or incurred by Buyer resulting from Seller’s failure to deliver the Wafers on the specified delivery dates. Title and risk of loss shall pass to Buyer upon Seller’s delivery of Wafers to Buyer. Seller shall not ship Wafers earlier than the delivery date specified in Buyer’s Order, it being understood that if Seller builds ahead Wafers pursuant to an Order submitted by Buyer, delivery may be made pursuant to the requested delivery date stated in such Order. Seller will promptly notify Buyer in writing of any delivery delays or pull-ins in Wafer exit-factory dates, and supply to Buyer at least weekly or at any time upon specific request, a Work in Progress (WIP) report. Any changes to such report must be mutually agreed upon. The average cycle time shall be at least as short as those Wafers supplied to other Seller customers in similar volumes.

7. **QUANTITIES.** Seller will furnish the specific quantity of Wafers called for in the Order. Except as otherwise specified in the Order or by prior written agreement signed by Buyer, no variation in these quantities will be accepted, and Buyer may return excess shipments at Seller’s expense.

8. **PACKAGING AND SHIPPING INSTRUCTIONS.**

A. **Packaging.** All Wafers are to be suitably packed or otherwise prepared for shipment to secure lowest transportation rates and to meet carrier’s requirements. Unless otherwise specified in the Order, Buyer is not responsible for any costs for packing, crating or carriage. Any losses resulting from Seller’s failure to follow Buyer routing instructions will be charged to Seller’s account.

B. **Marking.** Each shipping container and all intermediate containers must be marked to show Buyer’s Order number, part number with revision letter and quantity. A packing list showing this information must be included in each shipment, and the container having the packing list will be labeled on the exterior “Packing List Enclosed.” Upon establishment of quantity per shipping and/or intermediate container, future orders for that part will be packed in that quantity.

C. **Consolidation.** All materials to be shipped on a given day via the same mode of transportation from a common shipping point to a common address are to be consolidated into one shipment.

D. **Certificate of Analysis and Certificate of Compliance.** A Certificate of Analysis and Certificate of Compliance must be provided to Buyer with each shipment.

9. **INSPECTION.** Prior to shipment of Wafers, Seller shall carefully inspect and test all Wafers for compliance to applicable Buyer Specifications and Seller Quality and Reliability Criteria. Seller shall retain proper records of such inspections and tests and provide copies to Buyer, if requested. Unless otherwise specified in the Order, final acceptance or rejection of the Wafers shall be made after delivery to the final destination, however Buyer’s failure to accept or reject Wafers or detect defects during inspection does not relieve Seller from its responsibility to provide Wafers in accordance with Buyer Specifications and Order requirements. Buyer reserves the right to inspect Seller’s facilities at any time during the term of the Order to confirm that Seller is satisfying its obligations of testing, inspection and quality control. In accordance with ISO

Buyer may accept, without prejudice, a portion of any shipment, and, at its option, have Seller repair or replace any nonportion of the shipment at Seller's expense. These warranties will survive any inspection, delivery, acceptance or payment by Buyer for the Wafers and are in addition to, and shall not be construed as restricting or limiting any warranties of Seller, express or implied, that are provided by law or exist by operation of law. Buyer at its option may (a) return defective or nonconforming Wafers to Seller, at Seller's risk, for credit and Seller shall pay Buyer for all packing, handling and transportation expenses or (b) demand that Seller pay Buyer promptly for expenses incurred in remedying the defective or nonconforming Wafers; or (c) demand that Seller, upon notification from Buyer, expeditiously replace any defective or rejected Wafers, at Seller's expense.
