Schematic

Overtemperature Protection (OTP) and Overcurrent Protection (OCP) are not modeled in EE-Sim.

Increasing COUT1 will decrease the loop bandwidth and increase the phase margin. Decreasing COUT1 will have the opposite effect.

This note only applies to the online EE-Sim Design Tool: RSEL1, CSEL1, RSEL2, CSEL2, RSEL3 and CSEL3 are set to the proper values for the design requirements entered. To change any of the chip parameters that these components set, change the design requirements accordingly and create a new design.
